## Amber Rhino Pro / Amber Rhino

### WEEE directive:

"Electrical and electronic equipment (EEE) contains materials, components and substances that may be hazardous and present a risk to human health and the environment when waste electrical and electronic equipment (WEEE) is not handled correctly.

Equipment marked with the below crossed-out wheeled bin is electrical and electronic equipment. The crossed-out wheeled bin symbol indicates that waste electrical and electronic equipment should not be discarded together with unseparated household waste, but must be collected separately.

For this purpose all local authorities have established collection schemes under which residents can dispose waste electrical and electronic equipment at a recycling centre or other collection points, or WEEE will be collected directly from households. More detailed information is available from the technical administration of the relevant local authority.

Users of electrical and electronic equipment must not discard WEEE together with household waste. Residents must use the municipal collection schemes to reduce adverse environmental impacts in connection with disposal of waste electrical and electronic equipment and to increase opportunities for reuse, recycling and recovery of waste electrical and electronic equipment".

# Congratulations with your TreasureLight<sup>®</sup>

## Before you start:

1. Ensure that the batteries are fully charged.
2. Ensure that the batteries are inserted correctly into the torch.
3. Screw the end of the torch together with the rest of the torch housing.
4. Switch the light on/off by pressing the button.
5. Adjust the brightness by half pressing the button (strong-weak-strobe)

## Maintenance:

1. Always store the lamp in a dry environment to avoid corrosion in the lamp and batteries.
2. Always disconnect the batteries from the lamp after use. This is done to avoid the light being switched on by mistake or having low voltage.

## Security:

A **TreasureLight<sup>®</sup>** UV lamp is specially designed with powerful LEDs which make them particularly useful for searching for amber, fluorescent minerals and some types of fossils. It's fun to use but remember to do it with care. Always follow the safety advice and use protection glasses.

	Never shine the light directly into the eyes of yourself or others.
	Use UV glasses. The ultraviolet light can cause irritation and damage in the eyes.
	Always store the light in a dry environment to avoid corrosion in the light and batteries.
	Always use batteries of the same type and only use CE approved batteries.
	Do not hold your hand or other objects in front of the LEDs, as they may become hot.

## Scope of delivery:

### Amber Rhino:

3x Batteries, 1x charger + USB cable, 4x plastic inserts for different batteries types, user manual.

### Amber Rhino Pro:

4x Batteries, 1x charger + USB cable, 4x plastic inserts for different batteries types, user manual.

## Specifications:

	Amber Rhino PRO	Amber Rhino
<b>Effect</b>	225 watt	180 watt
<b>Funktionen</b>	High-Mellem-Lav-Strobe-SOS	
<b>Wavelength</b>	Ultraviolet light (395nm-410nm)	
<b>Waterproof</b>	IP68 (30m)	
<b>Runtime</b>	2-4 hours	
<b>Battery type</b>	2-4 pcs. 18650 or 26650 batteries	3 pcs. 18650 or 26650 batteries
<b>LED type</b>	15 x CREE XM-L T6 LED	12 x CREE XM-L T6 LED
<b>Dimensions</b>	385(L) x 80(HD) x 40(TD) mm.	332(L) x 80(HD) x 40(TD) mm.
<b>Weight</b>	803g (batteries excluded)	737g (Batteries excluded)
<b>Material</b>	Aluminium	
<b>Certifications</b>	CE-approved, RoHS.
