

Placement

- Choose the room with the best view from the outside.
- Place KEVIN 15-60 cm (6-5 inches) away from a wall.
- Set KEVIN up near a window or your front door to make sure his simulation is heard from the outside.
- Beware of placing KEVIN close to lamps, as this can interfere with his shadow effects.
- KEVIN needs cooling: Do not cover him! Do not place him on very soft surfaces (and do not block the ventilation holes).

Online or Offline: "You've got the choice!"

Decide whether you would like to use KEVIN in his online mode with our companion "Mitipi-Kevin" app or if you'd like to keep him offline.

Use the Mitipi-Kevin app to get the full potential of KEVIN!

Benefit from a customized simulation, automatic activation, the ability to connect multiple devices and more.

1. Download the Mitipi-Kevin app.
2. Make sure that you have enabled the location on your cell phone. (Android: Settings > Location > On; iOS: Settings > Privacy > Location Services > Share Location).
3. Open the Mitipi-Kevin app.
4. You will be asked for location access. You must allow this.
5. In the Mitipi-Kevin app, click on the orange box: "Add another Kevin!"
6. Follow the instructions in the Mitipi-Kevin app.

Offline mode

If you don't want or cannot connect KEVIN to the internet, a standard simulation will be played.

...just try it out and don't worry! You can't break anything.
